

**Prompt Section:**

The top text box. The primary interface.

This is where you type what you'd like to see. Be sure to be specific and include details such as composition, colors, poses and details. Not just a vague description.

**Negative Prompt Section:**

The bottom text box. The secondary interface.

This is where you specify anything you don't want to see. For the most part, if you are using a preset, this can remain empty. However, if you are looking for something specific and find you are getting something else instead, you can use this to clarify.

**Presets Tab:**

The drop down menu on the right side of the screen.

This is where you can select your presets. Presets are pre-made prompts that already include all the keywords and negative prompts required to generate decent images. You can click the paintbrush icon if you need to edit or add any presets.
