

API's	Pros	Cons
Stable Diffusion v4	-Might have most application -python, java, javascript	Expensive
Replicate	-Available in Python and Javascript -Pretty cheap	Not free
DALL-E	-v2 is pretty cheap -v3 works well	-v3 is expensive/needs chatgpt4 -v2 has minimal applications
Stable Diffusion v1.5	-Similar to v4 but FREE	-not as much use as v4
Dreambooth stable diffusion community model		
EdenAI	-Access to many AIs including the ones listed above -Free trial	-Eventually costs money
DeepAI	-Available in Python -Has a AI image editor and colorizer	-\$5/100 api calls for free account
Prodia	-Available in Python -free 1000 api generations/month	-\$0.0025 per generation after free trial
